

Special Purpose Plugs

General Description

Special purpose Test Plugs for testing the integrity of sockets on Gas Pipes. Avoided the need to pressure test a 1 kilometre Pipeline.

Features and Benefits

Pressure Plates are made of Steel. The Plugs are fitted with a Ball Bearing Race for ease of tightening. Rubber Seals are commercial grade rubber mouldings.

Special Plugs

We are very pleased to look at any special requirements. We have enormous expertise in stopping off Pipes in all environments – deep under sea, nuclear, naval, hazardous etc. Please contact us for assistance.
